Re: Docket # 04-IEP-IG

To Whom It May Concern:

I am writing in SUPPORT of including the CEC report, "Assessment of Avian Mortality from Collisions and Electrocutions" CEC-700-2005-015 by Melinda Dorn.

This report was done by professional and knowledgeable, and respected, scientists. As a person who is involved in the matter of environmental protection in the Altamont Pass area, I will be very distressed if the industry wins and the report is removed/discredited. This report has received peer review and industry review. However, the industry now wants it out of the report.

It is important that ALL information be available, not just that which favors the wind industry. I urge you not to give in to the industry in what is a blatant attempt to control the outcome of the issues in the Altamont Pass area.

Sincerely, Miles McKey, Golden Gate Audubon Society
